

# Mosaics

Compiled By: Herrin Emeludt Hänsler

- On heavy duty construction paper, very lightly draw a picture just a very simple outline. This outline will be your guide for later.
- Get some colored paper or craft foam (construction paper, wrapping paper, magazines, ect...) Cut them into that are smaller in size – the pieces can be simple squares and rectangles or they can be irregular shapes to add some variety.
- Glue your pieces of paper or foam over the drawing you made earlier. Let the glue dry.
- Remember.... Have fun, you are only limited by your imagination!
